

## POWER CONNECTORS

Maxell's PC-MF4 power tap compatible 4-way power connector is an ideal solution for powering multiple accessories via a single power output connector. The PC-MF4 provides four female outputs and one male connector allowing the user to run additional hardware off of a single connection.

The PC-MF is a single male to female combined power tap compatible power connector. Once plugged into a device and powering the equipment it's been wired to, the Maxell PC-MF provides another female socket.

Maxell's SP-PCUSB Charge Adapter, will allow you to use your camera battery as a back-up power source to recharge smart devices. The SP-PCUSB is an essential piece to any kit in remote locations when your only available power source is the camera battery.

### Features:

#### 4-Way PC Power Connector – PC-MF4

- One male power tap compatible connector
- Four female power tap compatible receptors
